

Small Miracles

It is a magical moment when babies come into this world. Parents, and staff, are transformed in deliveries. At Oroville Hospital, we know that the birth of your child, whether it's your first or your last, is a very special occasion as well as a deeply moving experience.

That's why our highly qualified staff provides state-of-the-art birthing services and we also strive to make your birth experience a memorable family event. Because the moment

secure knowing that the physicians are well-trained and experienced, and that the nursing staff includes RNs specially certified in obstetrics. With three dedicated labor, delivery, and recovery suites and post-partum rooms available, our birthing center is equipped with the latest technology to monitor and care for your baby throughout labor and delivery. All attempts are made to keep our patients in their own rooms privately.

album, and offer you a special dinner for two to celebrate your new addition to the family!

To learn more about having your baby at Oroville Hospital, please check online at www.OrovilleHospital.com or call 532-8440.

“This is the second child that I will be having at Oroville Hospital. I love the supportive staff and know I will get all the care I need.”

SUSIE SCHMIDT, OROVILLE

a child comes into this world is a pretty wonderful thing.

More than 600 babies get delivered at Oroville Hospital each year. Our care begins months before the date of birth — up to nine months, in fact!

Early in the first trimester, specialists in obstetrics are ready to meet with you in order to assist and educate you on your new journey. Support from Oroville Hospital also includes fertility advice, childbirth education, labor classes, lactation classes, Better Babies program, and even free membership at the Oroville Sports Club.

When you have your baby at Oroville Hospital, you can feel

At Oroville Hospital, all obstetricians are available to deliver your baby, are board certified and specialize in high-risk as well as routine pregnancies. You can elect for natural childbirth, or ask for assistance with pain management options including epidural anesthesia. Nurses will be at your side to coach you through labor, and can help you stay comfortable using guided imagery and relaxation techniques.

Once your baby is born, you'll have a choice of keeping your infant with you (called “rooming in”), or nurses will be happy to care for your baby in our nursery should you need a rest. If you wish, the certified lactation specialist will pay you a visit to educate you about breastfeeding. Before you leave the hospital, we'll even snap a few newborn photos for your baby
